📅 Presentation & Demonstrations

🕒 9:05 AM - 9:35 AM

Demonstrations: Startups helping telcos decarbonize

San Francisco 9:05 AM

Paris 6:05 PM

An inside look at innovative software and hardware solutions for the telco industry being deployed by visionary start-ups. New approaches to decarbonization will be demonstrated by Paul Schneider of Aradatum, an infratech tower company providing self-powered macro cell towers that can be placed literally anywhere for 5G; Rob Guyton of Encell, a green energy storage company offering clean batteries with the lowest levelized cost of storage (LCOS); and Serge Rigori of the Orange Fab France company Predictive Layer, whose AI / ML-powered platform enables customers to build and operate accurate and reliable forecast models.

📅 Keynote

🕒 10:00 AM - 10:30 AM

Reimagination in a time of change

San Francisco 10 AM

Paris 7 PM

What emerging trends will shape and impact our future? How can we adapt and innovate quickly in a changed world? Erica Orange of The Future Hunters uses macro technological, sociocultural, and economic trends as a catalyst to talk about the opportunities of tomorrow and how the current landscape will be transformed in the years to come. She will also address how best to develop future-proofed and actionable strategies to capitalize on where change is moving.

📅 Presentation & Demonstrations

🕒 10:30 AM - 10:55 AM

Industry 4.0: Decreasing the risk of automation with Robotics-as-a-Service (RaaS)

San Francisco 10:30 AM

Paris 7:30 PM

Explore Robotics-as-a-Service (RaaS), an emerging Industry 4.0 business model enabling organizations to hire robots by the hour at competitive wages. Along with a deep dive and Q&A on this new concept there will be a presentation by Saman Farid and Malcolm Kerr of Formic, an RaaS provider of wide-ranging robotic capabilities and one-stop shop automation partner for small- to medium-sized manufacturers.

📅 Panel

🕒 10:55 AM - 11:35 AM

Panel discussion: Is it time for 6G?

San Francisco 10:55 AM

Paris 7:55 PM

6G efforts are already well underway and lessons are being learned from 5G and its ongoing deployment. Professor Colleen Josephson, Senior Research Scientist at VMware, will moderate a panel of leading thinkers including Mike Nawrocki of Next G Alliance, Jan Soderstrom of Ericsson, and Professor Sanjay Shakkottai of University of Texas at Austin. The group will examine the road ahead and which applications can benefit from 6G and advance the user experience in evolving cyber worlds and the metaverse.
